Lesson Planning & Content Creation Tools

Eduaide.AI

Generates lesson plans, activities, and rubrics in 15+ languages.

Includes teaching assistant for IEPs and accommodations

[click to video](#)

MagicSchool AI

Offers 60+ tools for creating assessments and differentiated content.

Tailors materials to students' reading levels.

Twee

Designed for English teachers to generate texts and exercises.

Creates questions, essay topics, and grammar activities.

Interactive & Adaptive Learning Platforms

Curipod [video](#)

Create interactive lessons with polls and word clouds in minutes.

Includes SEL check-ins for emotional learning support.

Quizizz [video](#)

Designs quizzes that adapt to student responses.

Provides personalized learning paths with real-world scenarios.

Duolingo

Personalizes language learning experiences.

Adjusts difficulty based on performance data.

Funded by
the European Union

Classroom Management & Engagement Solutions with gamification

Classcraft

[video](#)

Gamifies classroom management by tracking behavior and engagement.

Rewards positive actions with points or badges.

Provides insights on student participation patterns.

Actionbound

[video](#)

Digital learning tool that lets teachers create interactive, game-like experiences using smartphones or tablets.

These activities, called Bounds, can include quizzes, GPS tasks, photos, videos, and QR codes.

Students complete the tasks by moving around in real life, making learning more engaging and active.

Actionbound is often used for field trips, museum visits, campus tours, or classroom projects.

Personalized Tutoring Systems

[video](#)

Khanmigo

AI tutor powered by GPT-4 for personalized help.

Covers math, reading, writing, and computer science.

Amira Learning

[video](#)

Improves reading fluency through audio feedback.

Listens to students read aloud and identifies improvement areas.

Progress Tracking

Both tools provide detailed student performance data.

Helps teachers identify intervention needs quickly.

Funded by
the European Union

Automated Assessment Tools

Quizgecko

[video](#)

Generates questions automatically from any text or topic.
Helps teachers quickly create quizzes and tests.

Cognii

[video](#)

Provides real-time feedback on open-ended responses.
Develops critical thinking through guided evaluation.

Time Savings

Reduces grading time by up to 70%.
Allows more focus on teaching and less on assessment.

Smart Content Creation Platforms

Identify Learning Objectives

Define what students should learn and understand.

Select Tool (Genially or Gamma)

Choose based on need for interactivity or visual appeal.

Create Engaging Content

Design interactive presentations with game mechanics.

Build visually appealing slides that simplify complex topics.

Implement in Classroom

Share with students and monitor engagement.

Team work

(mix group)

You will be randomly divided into three teams. Each team will be responsible for creating a short educational presentation using a Content Creation Tool such as MagicSchool or Eduaide.AI. The topic assigned to your group will focus on the use of digital collaboration tools in education:

- Group 1: Slack
- Group 2: Trello
- Group 3: A combination of Slack and Trello

Your presentation should highlight the tool's educational potential, and how it can support teaching and learning, especially when integrated with AI.

In addition, each group will design a short quiz to assess students' understanding of the content. The aim is to develop digital teaching resources while exploring AI-powered tools for content and assessment creation with a quizz app of your choice.
